Bombing to Win Robert A. Pape, 2014-04-11 From Iraq to Bosnia to North Korea, the first question in American foreign policy debates is increasingly: Can air power alone do the job? Robert A. Pape provides a systematic answer. Analyzing the results of over thirty air campaigns, including a detailed reconstruction of the Gulf War, he argues that the key to success is attacking the enemy's military strategy, not its economy, people, or leaders. Coercive air power can succeed, but not as cheaply as air enthusiasts would like to believe. Pape examines the air raids on Germany, Japan, Korea, Vietnam, and Iraq as well as those of Israel versus Egypt, providing details of bombing and governmental decision making. His detailed narratives of the strategic effectiveness of bombing range from the classical cases of World War II to an extraordinary reconstruction of airpower use in the Gulf War, based on recently declassified documents. In this now-classic work of the theory and practice of airpower and its political effects, Robert A. Pape helps military strategists and policy makers judge the purpose of various air strategies, and helps general readers understand the policy debates.

Recommendations on the Transport of Dangerous Goods United Nations, 2020-01-06 The Manual of Tests and Criteria contains criteria, test methods and procedures to be used for classification of dangerous goods according to the provisions of Parts 2 and 3 of the United Nations Recommendations on the Transport of Dangerous Goods, Model Regulations, as well as of chemicals presenting physical hazards according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS). As a consequence, it supplements also national or international regulations which are derived from the United Nations Recommendations on the Transport of Dangerous Goods or the GHS. At its ninth session (7 December 2018), the Committee adopted a set of amendments to the sixth revised edition of the Manual as amended by Amendment 1. This seventh revised edition takes account of these amendments. In addition, noting that the work to facilitate the use of the Manual in the context of the GHS had been completed, the Committee considered that the reference to the Recommendations on the Transport of Dangerous Goods in the title of the Manual was no longer appropriate, and decided that from now on, the Manual should be entitled Manual of Tests and Criteria.

Food Quality and Safety Systems Food and Agriculture Organization of the United Nations, 1998 One important element of FAO's work is building the capacity of food control personnel, including government authorities and food industry personnel carrying out food quality and safety assurance programmes. Such programmes should include specific food risk control procedures such as the Hazard Analysis and Critical Control Point (HACCP) system. FAO has prepared this manual in

an effort to harmonise the approach to training in the HACCP system based on the already harmonised texts and guidelines of the Codex Alimentarius Commission. The manual is structured to provide essential information in a standardised, logical and systematic manner while adhering to effective teaching and learning strategies. Each section is made up of specific training modules which can be combined and customised to meet the specific needs of the students. 1998 (first edition), 2009 (this reprint). Also published in French, Russian and Spanish.

The Essays of Warren Buffett Warren Buffett, 2021 As in previous editions of *The Essays of Warren Buffett*, this one retains the architecture and philosophy of the original edition but adds selections from Warren Buffett's most recent annual shareholder letters. All the letters are woven together into a fabric that reads as a complete and coherent narrative of a sound business and investment philosophy. As an aid to all readers, and to enable readers of the previous editions to see what is new in this one, a disposition table at the end of the book shows the various places in this collection where selections from each year's letter appear. Footnotes throughout indicate the year of the annual report from which essays are taken. To avoid interrupting the narrative flow, omissions of text within excerpts are not indicated by ellipses or other punctuation. This new edition is called for not because anything has changed about the fundamentals of Buffett's sound business and investment philosophy but because articulation of that philosophy is always delivered in the context of contemporary events and business conditions so periodic updating is warranted to maintain its currency

Beyond Winning Robert H. Mnookin, Scott R. Peppet, Andrew S. Tulumello, 2004-04-15 Conflict is inevitable, in both deals and disputes. Yet when clients call in the lawyers to haggle over who gets how much of the pie, traditional hard-bargaining tactics can lead to ruin. Too often, deals blow up, cases don't settle, relationships fall apart, justice is delayed. *Beyond Winning* charts a way out of our current crisis of confidence in the legal system. It offers a fresh look at negotiation, aimed at helping lawyers turn disputes into deals, and deals into better deals, through practical, tough-minded problem-solving techniques. In this step-by-step guide to conflict resolution, the authors describe the many obstacles that can derail a legal negotiation, both behind the bargaining table with one's own client and across the table with the other side. They offer clear, candid advice about ways lawyers can search for beneficial trades, enlarge the scope of interests, improve communication, minimize transaction costs, and leave both sides better off than before. But lawyers cannot do the job alone. People who hire lawyers must help change the game from conflict to collaboration. The entrepreneur structuring a joint venture, the plaintiff embroiled in a civil suit, the CEO negotiating an employment contract, the real estate developer concerned with environmental hazards, the parent considering a custody battle—clients who understand the pressures and incentives a lawyer faces can work more effectively within the legal system to promote their own best interests. Attorneys

exhausted by the trench warfare of cases that drag on for years will find here a positive, proven approach to revitalizing their profession.

Reclaiming health and safety for all Ragnar Lefstedt, Great Britain Department for Work and Pensions, 2011-11-28 The focus of this review has been on the 200 or so regulations and the 53 Approved codes of practice owned by the Health and Safety Executive. It concentrates on areas where evidence and contributions have indicated that regulations are putting undue costs on business whilst doing little to improve health and safety outcomes. The general sweep of requirements set out in health and safety legislation are broadly fit for purpose but there are a few that offer little benefit to health and safety and which the government should remove, revise or clarify, in particular the duties for self-employed people whose work activities pose no potential risk of harm to others. The much bigger problem is that regulator requirements are misunderstood and applied inappropriately and recommendations are put forward to address this. They seek to: streamline the body of regulation; re-direct enforcement activity towards business where there is the greatest risk of injury or ill health; re-balancing the civil justice system by clarifying the status of pre-action protocols and reviewing strict liability provisions
