Organizational Survival in the New World Alex Bennet,David Bennet,2004-02-18 In this book David and Alex Bennet propose a new model for organizations that enables them to react more quickly and fluidly to today's fast-changing, dynamic business environment: the Intelligent Complex Adaptive System (ICAS). ICAS is a new organic model of the firm based on recent research in complexity and neuroscience, and incorporating networking theory and knowledge management, and turns the living system metaphor into a reality for organizations. This book synthesizes new thinking about organizational structure from the fields listed above into ICAS, a new systems model for the successful organization of the future designed to help leaders and managers of knowledge organizations succeed in a non-linear, complex, fast-changing and turbulent environment. Technology enables connectivity, and the ICAS model takes advantage of that connectivity by fostering the development of dynamic, effective and trusting relationships in a new organizational structure. This book outlines the model in chapter four, and then breaks down the model into its components in the next two chapters. This is a benefit to readers since different components of the model can be implemented at different times, so the book can guide implementation of one or all of the components as a manager sees fit. There are eight characteristics of the ICAS: organizational intelligence, unity and shared purpose, optimum complexity, selectivity, knowledge centricity, flow, permeable boundaries, and multi-

dimensionality.

Comparative Governance B. Guy Peters, Jon Pierre, 2016-09-07 Decision-making is at the heart of governing and governance, and is a more challenging task compared to just a few decades ago as a result of increasing social complexity and globalization. In this book, B. Guy Peters and Jon Pierre propose a new framework for the comparative analysis of governance, arguing that government remains a central actor in governance. By articulating the functionalist dimension of governance they show how goal setting, resource mobilization, decision-making, implementation and feedback can be performed by a combination of different types of actors. Even so, effective governance requires a leading role for government. The framework is also applied to a taxonomy of governance arrangements and national styles of governing. *Comparative Governance* advances our knowledge about governance failure and how forms of governance may change. It also significantly strengthens the theory of governance, showing how governance can be studied conceptually as well as empirically.

Democratizing Democracy Boaventura de Sousa Santos, 2020-05-05 The major conflicts between the Global North and

the South can be expected to result from the confrontation of alternative conceptions of democracy, mainly between liberal or representative democracy and participatory democracy. The hegemonic model of democracy, while prevailing on a global scale, guarantees no more than low-intensity democracy. In recent times, participatory democracy has exhibited a new dynamic, engaging mainly subaltern communities and social groups that fight against social exclusion and the suppression of citizenship. In this collection of reports from the Global South-India, South Africa, Mozambique, Colombia, and Brazil-De Sousa Santos and his colleagues show how, in some cases, the deepening of democracy results from the development of dual forms of participatory and representative democracy, and points to the emergence of transnational networks of participatory democracy initiatives. Such networks pave one of the ways to the reinvention of social emancipation. This is volume 1 of the Reinventing Social Emancipation project, edited by Boaventura de Sousa Santos.

The Long Tail Chris Anderson, 2006-07-11 What happens when the bottlenecks that stand between supply and demand in our culture go away and everything becomes available to everyone? The Long Tail is a powerful new force in our economy: the rise of the niche. As the cost of reaching consumers drops dramatically, our markets are shifting from a one-size-fits-all model of mass appeal to one of unlimited variety for unique tastes. From supermarket shelves to advertising agencies, the ability to offer vast choice is changing everything, and causing us to rethink where our markets lie and how to get to them. Unlimited selection is revealing truths about what consumers want and how they want to get it, from DVDs at Netflix to songs on iTunes to advertising on Google. However, this is not just a virtue of online marketplaces; it is an example of an entirely new economic model for business, one that is just beginning to show its power. After a century of obsessing over the few products at the head of the demand curve, the new economics of distribution allow us to turn our focus to the many more products in the tail, which collectively can create a new market as big as the one we already know. The Long Tail is really about the economics of abundance. New efficiencies in distribution, manufacturing, and marketing are essentially resetting the definition of what's commercially viable across the board. If the 20th century was about hits, the 21st will be equally about niches.

The Theory of Need in Marx Agnes Heller, 2018-04-17 The basic discoveries underlying Marx's critique of political economy - labour power, surplus value, use value - are all in some way built upon the concept of need. From Marx's varying and passing interpretations of a theory of need, Agnes Heller unravels the main tendencies and demonstrates the importance which Marx attached to the restructuring of a system of needs going beyond the purely material. She also brings out those aspects, especially the idea of radical needs which point to revolutionary activity and to the project which Marx could only

foresee but which for us today is of real urgency: the society of associated producers. Thus Agnes Heller's study is not only the first full presentation of a fundamental aspect of Marx, but the basis for a discussion of the utmost contemporary relevance.
