O Conceito Funcional de Norma na Jurisprudência do Tribunal Constitucional: a fronteira entre o controlo de norma e o controlo de decisão Afonso Brás, 2023-06-29 O sistema português de fiscalização da constitucionalidade centra-se no controlo de “normas”, ficando de fora desse controlo atos não normativos, em especial as “decisões judiciais”. Desde cedo, porém, que o Tribunal Constitucional (TC) se deparou com uma questão: sendo o controlo normativo, sobre que “normas” é que deverá incidir? E como assegurar o respeito da fronteira que tem de existir entre controlo legítimo de norma e controlo ilegítimo de decisão judicial? A presente obra, partindo da análise do conceito “funcional” de norma desenvolvido pelo TC, explora todas as restantes situações ditas normativas que, sendo também “situações de fronteira”, e ocorrendo no contexto da decisão judicial recorrida, fazem surgir a questão de saber se o seu respetivo conhecimento, pelo TC, implica (ou não) um controlo dessa mesma decisão.

Biomecánica Funcional. Miembros, Cabeza, Tronco Michel Dufour, Michel Pillu, 2018-06-24 Manual de referencia que pone el acento en el conocimiento y la comprensión de un área pocas veces abordada desde este punto de vista, introduciendo al lector en la acción terapéutica apoyándose en referencias mecánicas simples y numerosos ejemplos ilustrados. Con un planteamiento original y principalmente pedagógico, se centra en la comprensión funcional del sistema músculo-esquelético: los miembros inferiores, las extremidades superiores, tronco, cuello, cabeza. Esta segunda edición actualiza el estudio de la mecánica aplicada al análisis del cuerpo en sus aspectos estáticos y dinámicos. Una vez abordadas las generalidades, en todas las partes del libro se hace hincapié en las características anatómicas esenciales, resaltando las incidencias prácticas, a las que siguen las consideraciones mecánicas referentes a la movilidad, la estabilidad y las tensiones, proponiéndose además ideas clave. Constituye un material de consulta de interés tanto para estudiantes de la asignatura de Biomecánica, impartida en los primeros cursos de Fisioterapia y que constituye la base fundamental que todo estudiante debe asimilar, como para profesionales. Más de 1000 imágenes ayudan a comprender el comportamiento de estructuras a menudo complejas.

Pesquisas em gramática funcional Erotilde Goreti Pezatti, 2009 Esta coletânea traz um conjunto de textos baseados em dissertações de alunos do Programa de Pós-Graduação em Estudos Lingüísticos da UNESP, campus de São José do Rio Preto, da área de Descrição e Análise Lingüística, que tratam da aplicação do modelo da Gramática Funcional Padrão ao português oral e escrito. Os autores integram o Grupo de Pesquisa em Gramática Funcional (GPGF), que tem se destacado nacional e internacionalmente como um dos grupos funcionalistas mais atuantes na área. O livro pretende não só divulgar esse modelo teórico como também mostrar sua eficácia na descrição lingüística, além de constituir a primeira obra em português a mostrar a contribuição dessa teoria para a descrição da língua portuguesa.

Program Development by Specification and Transformation Bernd Krieg-Brückner, 1993-08-30 This volume gives a

coherent presentation of the outcome of the project PROSPECTRA (PROgram development by SPECification and TRAnsformation) that aims to provide a rigorous methodology for developing correct software and a comprehensive support system. The results are substantial: a theoretically well-founded methodology covering the whole development cycle, a very high-level specification and transformation language family allowing meta-program development and formalization of the development process itself, and a prototype development system supporting structure editing, incremental static-semantic checking, interactive context-sensitive transformation and verification, development of transformation (meta-) programs, version management, and so on, with an initial library of specifications and a sizeable collection of implemented transformations. The intended audience for this documentation is the academic community working in this and related areas and those members of the industrial community interested in the use of formal methods.

Computer Message Systems, 85 Ronald P. Uhlig, 1986 This volume is a comprehensive cross-section of the most important issues in electronic messaging. The book is unique in that it addresses actual experiences with implementation and interconnection of X.400 compatible message systems. The contributions, from eleven different countries, are arranged under the following section headings: The X.400 Era; Directories; Group Communications; Planning for Interconnection; Document and Message Architecture; User Environment; Experience; Multimedia; Security and Control. In addition, the book contains two papers discussing issues raised during the sessions on voice messaging and on ARPA-Internet Gateway Standards (planning an X.400 gateway to ARPANET). Developers, managers and planners of electronic message systems, as well as professors and graduate students will all find this book to be of great interest.

, 2017-05-04 Este livro se baseia em diversas temáticas relacionadas aos requisitos de sistemas de engenharia, sobretudo o levantamento, a negociação, a priorização e a documentação (seja em linguagem natural, seja por meio de modelos gráficos), com o objetivo de proporcionar ao leitor o acesso a métodos e técnicas que o ajudem a caracterizar, de forma sistemática, os requisitos dos sistemas que se pretendem projetar. Esta obra pode ser adotada como referência principal em disciplinas de bacharelado e mestrado relativas à problemática dos requisitos em projetos de software, ou como obra de apoio à temática dos requisitos em disciplinas de âmbito mais amplo (por exemplo, engenharia de sistemas, engenharia de software, engenharia de sistemas de informação, gestão de projetos). Pode igualmente ser utilizada em cursos de formação profissional

ou em ações de reciclagem de profissionais ligados à análise e à concepção de sistemas e gestão de projetos, que têm a oportunidade de abordar, de forma sistematizada e organizada, algumas temáticas de seu interesse. Cada um dos capítulos inclui no final um conjunto de exercícios que o leitor poderá explorar, a fim de testar os conhecimentos sobre as temáticas abordadas.

Competing Models of Linguistic Change Ole Nedergaard Thomsen, 2006 The articles of this volume are centered around two competing views on language change originally presented at the 2003 International Conference on Historical Linguistics in the two important plenary papers by Henning Andersen and William Croft. The latter proposes an evolutionary model of language change within a domain-neutral model of a 'generalized analysis of selection', whereas Henning Andersen takes it that cultural phenomena could not possibly be handled, i.e. observed, described, understood, in the same way as natural phenomena. These papers are models of succinct presentation of important theoretical framework. The other papers present and discuss additional models of change, e.g. invisible hand-processes, system-internal models, functional and cognitive models. Most papers do not subscribe to the evolutionary model; instead, they focus on functional factors in the

selection and propagation of variants (as opposed to factors of code efficiency), or on cognitive and pragmatic perspectives. Several papers are inspired by the late Eugenio Coseriu and by Henning Andersen's theories on language change. In particular, the volume contains articles proposing interesting grammaticalization studies and extended models of grammaticalization. The clear presentation of important and competing approaches to fundamental questions concerning language change will be of high interest for scholars and students working in the field of diachrony and typology. The languages referred to in the papers include Cantonese, the Chukotko-Kamchatkan languages, Danish, English, Eskimo languages, German, Norwegian, Russian, Spanish, and Swedish.

Las Cualidades que debe poseer un ciudadano, de acuerdo a la conceptualizaci—n Ontol—gica del Ser Humano y la Filosofía del Derecho Acacio Edmundo Macip Toral, 2015-03-04 El presente trabajo, es un tema que se ubica, dentro de uno mayor llamado Inteligencias múltiples. Mi propuesta es desarrollar siete inteligencias prioritarias, acordes con el ideal constitucional (...desarrollar armónicamente, todas las facultades del ser humano. Art. 3). Al desarrollar estas siete capacidades (meta-normas), desarrollaríamos una cultura jurídica tal, que estimularía una conducta acorde con la legalidad y esto evitaría un sinnúmero de acciones, fuera del orden.
