The Environmental Case for Brexit Ben Pontin, 2019-05-30 The recent Brexit debates present leaving the European Union largely as a threat to environmental protection, and to environmental law. This exciting and important new work argues that Brexit represents a real opportunity for environmental protection in the United Kingdom, freeing it from a pan-European framework not necessarily fit for UK domestic purposes. Central to the argument is the belief that environmental protection, in the United Kingdom, can most effectively be pursued through established domestic institutions, looking inwards at 'local' challenges and outwards at more global ones, all the while drawing on considerable historical experience. The book is designed to address rather than dismiss those concerns raised by environmental lawyers after the outcome of the referendum. Provocative and compelling, it offers an alternative vision of the UK environmental law framework outside of the European Union.

Androgen Action in Prostate Cancer Donald Tindall,James Mohler,2009-04-20 Androgens are critical regulators of prostate differentiation and function, as well as prostate cancer growth and survival. Therefore, androgen ablation is the preferred systemic treatment for disseminated prostate cancer. Androgen action is exerted in target tissues via binding the androgen receptor (AR), a nuclear receptor transcription factor. Historically, the gene expression program mediated by the AR has been poorly understood. However, recent gene expression profiling and more traditional single-gene characterization studies have revealed many androgen-regulated genes that are important mediators of androgen action in both normal and

malignant prostate tissue. This book will focus on the androgen-regulated gene expression program, and examine how recently identified androgen-regulated genes are likely to contribute to the development and progression of prostate cancer. Recent studies that have attempted to unravel how these genes are deregulated in androgen depletion independent prostate cancer will be included

Nonlinear Optics George I. Stegeman,Robert A. Stegeman,2012-06-29 Clear, integrated coverage of all aspects of nonlinear optics—phenomena, materials, and devices Coauthored by George Stegeman, one of the most highly respected pioneers of nonlinear optics—with contributions on applications from Robert Stegeman—this book covers nonlinear optics from a combined physics, optics, materials science, and devices perspective. It offers a thoroughly balanced treatment of concepts, nonlinear materials, practical aspects of nonlinear devices, and current application areas. Beginning with the presentation of a simple electron on a spring model—to help readers make the leap from concepts to applications—Nonlinear Optics gives comprehensive explanations of second-order phenomena, derivation of nonlinear susceptibilities, third-order nonlinear effects, multi-wave mixing, scattering, and more. Coverage includes: Nonlinear response of materials at the molecular level Second-order nonlinear devices, their optimization and limitations The physical origins of second- and third-order nonlinearities Typical frequency dispersion of nonlinearities, explained in terms of simple two- and three-level models Ultrafast and ultrahigh intensity processes Practice problems demonstrating the design of such nonlinear devices as frequency doublers and optical oscillators Based on more than twenty years of lectures at the College of Optics and Photonics (CREOL) at the University of Central Florida, Nonlinear Optics introduces all topics from the ground up, making the material easily accessible not only for physicists, but also for chemists and materials scientists, as well as professionals in diverse areas of optics, from laser physics to electrical engineering.

Sound Branding, a vida sonora das marcas Zanna,2017-03-06 Entender o que é Sound Branding é entender a relação das marcas com o som. Assim como os especialistas em branding visual escolhem formas, logotipo, fotografia e casting, profissionais do Sound Branding recorrem à voz e ao jeito de falar, aos ritmos, timbres e instrumentos musicais para definir a personalidade sonora de uma marca. Cria-se, assim, um vocabulário sonoro personalizado para traduzir o DNA da marca em sons que são prontamente reconhecidos. Isso está todo dia no seu cotidiano. E nesta obra você vai ver como surgiram alguns

deles. Além de mostrar os caminhos para alcançar resultados nessa área, a autora sugere ainda o desenvolvimento de um Sound Branding pessoal. Para ela, cada indivíduo pode ser entendido como uma marca única, com seu nome, discurso, seus hábitos, e assim se beneficiar do som na construção da sua imagem pessoal. Com a garantia de que isso vai ser definitivamente divertido!

Women's Football in a Global, Professional Era Alex Culvin, Ali Bowes, 2023-03-09 *Women's Football in a Global, Professional Era* is an important addition to discussions on sport as work for women, and an essential reference point for students, researchers and sports professionals interested in the debates around the professionalisation of women's football internationally.

Memorias del IV Congreso Mundial de Cardiología ,1963

Women's Club Football in Brazil and Colombia Mark Biram, 2024-01-15 The first women's football book on Latin America centring the perspectives of players brings rare interview material that cuts through the clichés to uncover the lived reality of women footballers. It includes the first large-scale survey of South American women footballers' views into dialogue with institutional and media perspectives. The early chapters consider the backdrop Latin American women footballers operate in, a media and institutional panorama that privileges a heteronormative athletic femininity whilst ensuring women's football is never portrayed as anything other than an inferior version of the hegemonic (men's) game. Following this, drawing on nine months of ethnographic fieldwork in which 33 semi-structured interviews were carried out with players and institutional figures, this pioneering book foregrounds the lived reality of women's football in three strategic locations. Firstly, three months were spent in the Amazon region of Brazil where Esporte Clube Iranduba provides a fascinating alternative model for the growth of women's football. This is contrasted with Santos FC, where women's football tends to be constantly overshadowed by the presence of banal patriarchy, and finally with another fleeting glimpse of how another model is possible at Atlético Huila of Colombia, the surprise winner of the women's Copa Libertadores in 2018.
