Uma transformação que, para diversos cientistas da comunicação, acelerou o processo de virtualização dos seres humanos e de suas relações para com o outro e, obviamente, com os meios de comunicação. Sem dúvida, testemunhamos uma reconfiguração do ecossistema midiático. Com esse tema norteador às conferências, realizamos

o 5º Congresso Internacional Media Ecology and Image Studies – MEISTUDIES, que contou com o tema “A virtualização do novo ecossistema midiático”. O evento também foi marcado pela realização paralela do VI Seminário Internacional Red ITC, evento que nos acompanha pelo terceiro ano consecutivo. Já em sua quinta edição, o MEISTUDIES repetiu a sua programação e formato de participação totalmente assíncrono, colaborando com a preservação da saúde cognitiva dos participantes. Acreditamos que o conteúdo assíncrono facilita a disseminação do conhecimento, e está é a nossa missão como evento científico. Para tanto, contamos com a parceria dos 15 conferencistas e das coordenações das 13 mesas de trabalho, um staff que reuniu mentes representantes de nove países.

Content Inc.: How Entrepreneurs Use Content to Build Massive Audiences and Create Radically Successful Businesses Joe Pulizzi, 2015-09-04 The NEW Rulebook for Entrepreneurial Success What's the surest way to startup failure? Follow old, outdated rules. In Content Inc., one of today's most sought-after content-marketing strategists reveals a new model for entrepreneurial success. Simply put, it's about developing valuable content, building an audience around that content, and then creating a product for that audience. Notice a shift? Author Joe Pulizzi flips the traditional entrepreneurial approach of first creating a product and then trying to find customers. It's a brilliant reverse-engineering of a model that rarely succeeds. The radical six-step business-building process revealed in this book is smart, simple, practical, and cost-effective. And best of all, it works. It's a strategy Pulizzi used to build his own successful company, Content Marketing Institute, which has landed on Inc. magazine's list of fastest growing private companies for three years straight. It's also a strategy countless other entrepreneurs use to build their own multi-million dollar companies. Build an audience and you'll be

able to sell pretty much anything you want. Today's markets are more dynamic and customers are more fickle than ever before. Why would you put all your eggs in one basket before securing a loyal customer base? Content Inc. shows you how to get customers first and develop products later. It's the best way to build a solid, long-lasting business positioned for today's content-driven world. This is the simple but profoundly successful entrepreneurial approach of one of today's most creative business minds. A pioneer of content marketing, Pulizzi has cracked to code when it comes to the power of content in a world where marketers still hold fast to traditional models that no longer work. In Content Inc., he breaks down the business-startup process into six steps, making it simple for you to visualize, launch, and monetize your own business. These steps are:

- The "Sweet Spot": Identify the intersection of your unique competency and your personal passion
- Content Tilting: Determine how you can "tilt" your sweet spot to find a place where little or no competition exists
- Building the Base: Establish your number-one channel for disseminating content (blog, podcast, YouTube, etc.)
- Harvesting Audience: Use social-media and SEO to convert one-time visitors into long-term subscribers
- Diversification: Grow your business by expanding into multiple delivery channels
- Monetization: Now that your expertise is established, you can begin charging money for your products or services

This model has worked wonders for Pulizzi and countless other examples detailed in the book. Connect these six pieces like a puzzle, and before you know it, you'll be running your own profitable, scalable business. Pulizzi walks you step by step through the process, based on his own success (and failures) and real-world multi-million dollar examples from multiple industries and countries. Whether you're seeking to start a brand-new business or drive innovation in an existing one, Content Inc. provides everything you need to reverse-engineer the traditional entrepreneurial model for better, more sustainable success. Joe Pulizzi is an entrepreneur, professional speaker, and podcaster. He is the founder of several startups, including the Content Marketing Institute (CMI), recognized as the fastest growing business media company by Inc. magazine in 2014. CMI produces Content Marketing World, the world's largest content marketing event, and publishes the leading content marketing magazine, Chief Content Officer. Pulizzi's book *Epic Content Marketing* was named one of Fortune magazine's Five Must Read Business Books of the Year.

Nosso cotidiano não é mais o mesmo, e nem voltará a ser. As características de rotinas profissionais, educacionais e culturais certamente deixarão alguns traços, mesmo quando a humanidade estiver imunizada e a circulação de pessoas voltar a ser uma realidade. Nesse cenário de mudanças, o ecossistema midiático acaba

por testemunhar novas combinações, onde atores sociais aprendem a conviver de outras formas com os meios e as tecnologias. É importante perceber, também, que as mudanças sofridas pela humanidade fizeram com que testemunhássemos processos importantes de ressignificação. Nesse ambiente transformador, enfrentamos forças contrárias (a da informação e a da alienação), onde interesses econômicos, em diversos casos, colocaram em risco a própria vida humana. Debater sobre essa temática tornou-se ainda mais importante. Preocupados com essa reviravolta, popularmente conhecida como novo normal, realizamos o 4º Congresso Internacional Media Ecology and Image Studies – MEISTUDIES, que teve como tema “Desafios e reflexões sobre o ecossistema midiático pós pandemia”. O evento também foi marcado pela realização paralela do V Seminário Internacional Red ITC, que traz o tema “Formación de competencias y virtualización en la docencia e investigación en comunicación”. Em sua quarta edição, novamente realizada totalmente virtual, o MEISTUDIES reuniu participantes de 11 países. A partir do evento, organizou-se uma série de obras acadêmicas com textos apresentados e reavaliados para compor os livros.

Ageing with Smartphones in Urban Brazil Marília Duque, 2022-04-21 With people living longer all over the world, ageing has been framed as a socio-economic problem. In Brazil, older people are expected to remain healthy and autonomous while actively participating in society. Based on ethnographic research in São Paulo, Ageing with Smartphones in Urban Brazil shows how older people in a middle-class neighbourhood conciliate these expectations with the freedom and pleasures reserved for the Third Age. Work is what bonds this community together, providing a sense of dignity and citizenship. Smartphones have become of great importance to the residents as they search for and engage in new forms of work and hobbies. Connected by a digital network, they work as content curators, sharing activities that fill their schedule. Managing multiple WhatsApp groups is a job in itself, as well as a source of solidarity and hope. Friendship groups help each to download new apps, search for medical information and guidance, and navigate the city. Together, they are reinventing themselves as volunteers, entrepreneurs and influencers, or they are finding a new interest that gives their later life a purpose. The smartphone, which enables the residents to share and discuss their busy lives, is also helping them, and us, to rethink the very representation of ageing.

The Global Smartphone Daniel Miller ,Laila Abed Rabho ,Patrick Awondo , Maya de Vries,Marília Duque,Pauline Garvey, Laura Haapio-Kirk,Charlotte Hawkins,Alfonso Otaegui ,Shireen Walton,Xinyuan Wang, 2021-05-06 The smartphone is often literally right in front of our nose, so you would think we would know what it is. But do we? To find out, 11 anthropologists each spent 16 months living in communities in Africa, Asia, Europe and South America, focusing on the take up of smartphones by older people. Their research reveals that smartphones are technology for everyone, not just for the young. The Global Smartphone presents a series of original perspectives deriving from this global and comparative research

project. Smartphones have become as much a place within which we live as a device we use to provide 'perpetual opportunism', as they are always with us. The authors show how the smartphone is more than an 'app device' and explore differences between what people say about smartphones and how they use them. The smartphone is unprecedented in the degree to which we can transform it. As a result, it quickly assimilates personal values. In order to comprehend it, we must take into consideration a range of national and cultural nuances, such as visual communication in China and Japan, mobile money in Cameroon and Uganda, and access to health information in Chile and Ireland - all alongside diverse trajectories of ageing in Al Quds, Brazil and Italy. Only then can we know what a smartphone is and understand its consequences for people's lives around the world.

Strengthening Forensic Science in the United States National Research Council, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Identifying the Needs of the Forensic Sciences Community, 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
