*National Health Policy Thrust in Relation to Health Information Management. A Concise Review* Yusuf

Popoola,2022-03-22 Academic Paper from the year 2021 in the subject Health - Fitness and Health Management, grade: 4.51, , language: English, abstract: This article describes what the main components of a national health policy should be, including the political, economic, social, and cultural determinants of health, the most important determinants of health in any country; the lifestyle determinants, which have been the most visible types of public interventions; and the socializing and empowering determinants, which link the first and second components of a national health policy. The individual interventions and the collective interventions. The author discusses the indicators that should be used for each component and for each intervention. The feasibility of this approach depends to a large degree on the political will of the national authorities and the broad understanding of the actual determinants of health. A good first step is the National Health Policy plan developed by the Swedish social democratic government. This article builds on and expands on that model. The National Health Policy thrust represents the collective will of the governments and people of this country to provide a comprehensive health care system that is based on primary health care. It describes the goals, structure, strategy and policy direction of the health care delivery system in Nigeria. It defines the roles and responsibilities of the three tiers of government without neglecting the non-governmental actors. Its long-term goal is to provide the entire population with adequate access not only to primary health care but also to secondary and tertiary services through a well-functioning referral system. Unfortunately, most nation states have taken health policy to mean medical care policy. Medical care, however, is only one variable in a nation's health equation.

The Future of Public Health Committee for the Study of the Future of Public Health, Division of Health Care Services, Institute of Medicine, 1988-01-15 The Nation has lost sight of its public health goals and has allowed the system of public health to fall into 'disarray', from *The Future of Public Health*. This startling book contains proposals for ensuring that public health service programs are efficient and effective enough to deal not only with the topics of today, but also with those of tomorrow. In addition, the authors make recommendations for core functions in public health assessment, policy development, and service assurances, and identify the level of government--federal, state, and local--at which these functions would best be handled.

Organization and Financing of Public Health Services in Europe Who Regional Office for Europe, Centers of Disease Control, 2018-06-29 What are public health services? Countries across Europe understand what they are or what they should include differently. This study describes the experiences of nine countries detailing the ways they have opted to organize and finance public health services and train and employ their public health workforce. It covers England France Germany Italy the Netherlands Slovenia Sweden Poland and the Republic of Moldova and aims to give insights into current practice that will support decision-makers in their efforts to strengthen public health capacities and services. Each country chapter captures the historical background of public health services and the context in which they operate; sets out the main organizational structures; assesses the sources of public health financing and how it is allocated; explains the training and employment of the public health workforce; and analyses existing frameworks for quality and performance assessment. The study reveals a wide range of experience and variation across Europe and clearly illustrates two fundamentally different approaches to public health services: integration with curative health services (as in Slovenia or Sweden) or organization and provision through a separate parallel structure (Republic of Moldova). The case studies explore the context that explain this divergence and its implications. This study is the result of close collaboration between the European Observatory on Health

Systems and Policies and the WHO Regional Office for Europe Division of Health Systems and Public Health. It accompanies two other Observatory publications Organization and financing of public health services in Europe and The role of public health organizations in addressing public health problems in Europe: the case of obesity alcohol and antimicrobial resistance (both forthcoming).
