Abordagens e experiências na preservação do patrimônio cultural nas Américas e Península Ibérica Marcos José de A. Pinheiro, Claudia S. Rodrigues de Carvalho, Carla Maria Teixeira Coelho, 2021-02-10 O livro é resultado do trabalhos de profissionais que atuam em diferentes áreas do patrimônio cultural nas Américas e Península Ibérica, movidos por interesses, trajetórias e contextos distintos, que se entrelaçam em momentos e encerram causas comuns e consensos, dos quais destaca-se o valor central que é o compartilhamento de suas experiências, práticas e conhecimentos; a compreensão comum de que a preservação e a valorização do patrimônio cultural pressupõem aprender e avançar juntos, solidariamente; e a percepção, que se transforma em responsabilidade, do quanto toda a humanidade pode ser afetada a partir da perda de um bem ou de uma manifestação cultural local.

Iracema, The Honey-lips José Martiniano de Alencar, Lady Isabel Burton, 2023-07-18 Experience the magic and mystery of Brazil's rich cultural heritage with this classic tale from master storyteller José de Alencar. Matrix Structural Analysis William McGuire, Richard H. Gallagher, Ronald D. Ziemian, 1999-07-30 Entire book and illustrative examples have been edited extensively, and several chapters repositioned. * Imperial units are used instead of SI units in many of the examples and problems, particularly those of a nonlinear nature that have strong implications for design, since the SI system has not been fully assimilated in practice.

Remote Sensing and Image Interpretation Thomas M. Lillesand, Ralph W. Kiefer, Jonathan W. Chipman, 2004 From recent developments in digital image processing to the next generation of satellite systems, this book provides a comprehensive introduction to the field of remote sensing and image interpretation. This book is discipline neutral, so readers in any field of study can gain a clear understanding of these systems and their virtually unlimited applications. * The authors underscore close interactions among the related areas of remote sensing, GIS, GPS, digital image processing, and environmental modeling. * Appendices include material on sources of remote sensing data and information, remote sensing periodicals, online glossaries, and online tutorials.

Industrial Chemical Process Design, 2nd Edition Douglas Erwin, 2014 Written by a hands-on industry consultant and featuring more than 200 illustrations,

Moving People and Knowledge Louise Ackers, Bryony Gill, 2009-01-01 The book can be seen as a welcomed contribution to this field of study. . . [it] raises some important questions and problems of scientific mobility. Høgni Kalsø Hansen, Papers in Regional Science This is a very timely book looking at East West migration, which has recently become a hot political issue in various West European countries. It does an excellent job in laying out the intricacies of mobility that affect different groups, particularly knowledge migrants . The book successfully shows that knowledge migrants follow different motivational routes than other groups of migrants in their choice of mobility between institutes and nations. It makes a valuable contribution to a growing body of research that seeks to change established thinking and rhetoric about migration and to shift it from a dualistic thinking of migration in terms of economic vs. non-economic migrants. What this book shows is that the professional identity of people often supersedes their nationalities in relation to why and where they move. Sami Mahroum, NESTA, UK Based on excellent empirical research on migrating scientists from Poland and Bulgaria to the UK and Germany, this book follows an innovative agenda which is crucial to the world today the movement of people and the movement of knowledge. It achieves this by a creative blend of analysing personal stories, embedded in their professional and family networks, on the one hand, and macro-scale discussions of brain drain, brain gain and national and European policy implications on the other. Russell King, University of Sussex, UK This book makes a timely contribution to understanding the circulation of scientific knowledge via international mobility. It skillfully combines an analysis of structural and institutional changes, with a focus on individual circumstances, life courses and motivations. The outcome is a compelling account of the role of international migration in the transfer of knowledge across borders, and in shaping the careers of individual scientists. This places people and human mobility at the heart of the debate about how the knowledge economy is produced and reproduced. Allan Williams, London Metropolitan University, UK Moving People and Knowledge provides a fresh examination of the processes of highly skilled science migration. Focusing on intra-European mobility and, in particular, on the new dynamics of East West migration, the authors investigate the movement of Polish and Bulgarian researchers to and from the UK and Germany. Key questions include: who is moving, how long for, and why? In addressing the motivations and experiences of mobile scientists and their families, insights into professional and personal motivations are provided, demonstrating how relationships, networks and infrastructures shape decision-making. This book provides a useful perspective on the implications of increasing researcher mobility for both sending and receiving regions and the individuals concerned which is necessary for the construction of future policies on sustainable scientific development. This

empirical account provides a nuanced analysis of the duration and flow of scientific mobility showing the prevalence of repeat and shuttle moves in science careers. It will be of particular interest to researchers in European social policy, migration studies and EU law, as well as policymakers in the field of highly skilled migration especially those working on the free movement of persons provisions and the European Research Area and European Area of Higher Education.

Captains of the Sands Jorge Amado, 2013-06-25 A Brazilian Lord of the Flies, about a group of boys who live by their wits and daring in the slums of Bahia A Penguin Classics They call themselves "Captains of the Sands," a gang of orphans and runaways who live by their wits and daring in the torrid slums and sleazy back alleys of Bahia. Led by fifteen-year-old "Bullet," the band—including a crafty liar named "Legless," the intellectual "Professor," and the sexually precocious "Cat"—pulls off heists and escapades against the right and privileged of Brazil. But when a public outcry demands the capture of the "little criminals," the fate of these children becomes a poignant, intensely moving drama of love and freedom in a shackled land. Captains of the Sands captures the rich culture, vivid emotions, and wild landscape of Bahia with penetrating authenticity and brilliantly displays the genius of Brazil's most acclaimed author. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

Environmental Contamination J.-P. Vernet, 1993-11-04 This book deals with various aspects of environmental contamination. One of the fields considered in this work is atmospheric pollution. This has become a major problem of our time, and could soon develop into a scandal through the overestimation of the impact of greenhouse gases such as ozone, NO_x or SO₂, which allows their use as political instruments. Another growing field of importance covers the fundamental questions posed by the problem of soils and their interaction with waste from human activities, eg. sterile mining waste, sewage sludge, and contaminated dredged material. How do these different elements react and how tolerant can our system be towards them? This publication, containing a selection of the most important work presented at the 5th International Conference on Environmental Contamination, reflects some aspects of the present state of research and our society's dominant preoccupations.

The Landscapes of the Sublime 1700-1830 C. Duffy, 2013-08-08 The Landscapes of the Sublime examines the place of the 'natural sublime' in the cultural history of the eighteenth century and Romantic period. Drawing on a range of scholarship and historical sources, it offers a fresh perspective on the different species of the 'natural sublime' encountered by British and European travellers and explorers.

Bitita's Diary: The Autobiography of Carolina Maria de Jesus Carolina Maria De Jesus, Robert M. Levine, Beth Joan Vinkler, Emanuelle Oliveira, 2015-05-20 Carolina Maria de Jesus (1914-1977), nicknamed Bitita, was a destitute black Brazilian woman born in the rural interior who migrated to the industrial city of Sao Paulo. This is her autobiography, which includes details about her experiences of race relations and sexual intimidation.

Essentials of Medical Geology Olle Selinus, 2013-03-30 Essentials of Medical Geology reviews the essential concepts and practical tools required to tackle environmental and public health problems. It is organized into four main sections. The first section deals with the fundamentals of environmental biology, the natural and anthropogenic sources of health elements that impact health and illustrate key biogeochemical transformations. The second section looks at the geological processes influencing human exposure to specific elements, such as radon, arsenic, fluorine, selenium and iodine. The third section presents the concepts and techniques of pathology, toxicology and epidemiology that underpin investigations into the human health effects of exposure to naturally occurring elements. The last section provides a toolbox of analytical approaches to environmental research and medical geology investigations. Essentials of Medical Geology was first published in 2005 and has since won three prestigious rewards. The book has been recognized as a key book in both medical and geology fields and is widely used as textbook and reference book in these fields. For this revised edition, editors and authors have updated the content that evolved a lot during 2005 and added two new chapters, on public health, and agriculture and health. This updated volume can now continue to be used as a textbook and reference book for all who are interested in this important topic and its impacts the health and wellbeing of many millions of people all over the world. · Addresses key topics at the intersection of environmental science and human health · Developed by 60 international experts from 20 countries and edited by professionals from the International Medical Geology Association (IMGA) · Written in non-technical language for a broad spectrum of readers, ranging from students and professional researchers to policymakers and the general public · Includes color illustrations throughout, references for further investigation and other aids to the reader

The Poor in Western Europe in the Eighteenth and Nineteenth Centuries Stuart Woolf, 2016-09-19 First published in 1986, this book examines poverty and changing attitudes towards the poor and charity across England, France and Italy. It discusses the causes of poverty and the distinctions between the poor and the class-conscious proletariat. Taking early nineteenth-century Italy as a special study, it uses the exceptionally rich documentary sources from this time to examine such issues as charity, repression, the reasons why families suffered poverty and what strategies they adopted for survival. In this study, Stuart Woolf takes full account of recent work in historical demography and in sociological studies of poverty and the welfare state to produce this original and thoughtful work. This book will be of interest to those studying the history of poverty, class and the welfare state.

The Established and the Outsiders Norbert Elias, John L. Scotson, 1994-01-01 This new edition of this classic text from

one of the major figures of world sociology includes an introduction published in English for the first time. In Norbert Elias's hands, a local community study of tense relations between an established group and outsiders becomes a microcosm that illuminates a wide range of sociological configurations including racial, ethnic, class and gender relations. The Established and the Outsiders examines the mechanisms of stigmatization, taboo and gossip, monopolization of power, collective fantasy and 'we' and 'they' images which support and reinforce divisions in society. Developing aspects of Elias's thinking that relate his work to current sociological concerns, it presents the

Research and the Quality of Science Education Kerst Boersma, Martin Goedhart, Onno de Jong, Harrie Eijkelhof, 2006-02-23 In August 2003 over 400 researchers in the field of science education from all over the world met at the 4th ESERA conference in Noordwijkerhout, The Netherlands. During the conference 300 papers about actual issues in the field, such as the learning of scientific concepts and skills, scientific literacy, informal science learning, science teacher education, modeling in science education were presented. The book contains 40 of the most outstanding papers presented during the conference. These papers reflect the quality and variety of the conference and represent the state of the art in the field of research in science education.

Non-Conventional Materials and Technologies Khosrow Ghavami, Pedro Jesús Herrera Franco, 2018-11-25 The book presents new research in the area of biobased "green composites". Biobased materials involve renewable agricultural and forestry feedstocks, including wood, agricultural waste, grasses and natural plant fibers. These lignocellulosic materials are composed mainly of carbohydrates such as sugar and lignin, cellulose, vegetable oils and proteins. Much research is concerned with renewable materials such as bamboo, vegetable fibers, soil composites and recycled materials such as rice husk ash and sugar cane ash. The general aim here is to use renewable and non-polluting materials in ways that offer a high degree of sustainability and preserve the remaining natural resources for future generations. Keywords: Biobased Materials, Renewable Materials, Non-polluting Materials, Sustainability, Wood, Agricultural Waste, Grasses, Natural Plant Fibers, Lignocellulosic Materials, Carbohydrates, Sugars, Lignin, Cellulose, Vegetable Oils, Proteins, Bamboo, Vegetable Fibers, Soil Composites, Recycled Materials, Rice Husk Ash, Sugar Cane Ash, Fiber-reinforced Concrete, Post-disaster Reconstruction, Guadua Fibers, Prefabricated Bamboo Guadua Panels, Multi-Level Bamboo Structures, Alkaline Activated Cements, Polymer Residues Reinforced with Glass Fiber, Composites Reinforced with Vegetal Fibers, Sisal Fibers, Bamboo Arch Structure, Adobe Reinforced with Wheat Fibers, Fiber Reinforced Microconcrete, Cements with High Coal Waste Contents, Natural Composites, Geopolymer Concretes.
