## John Staller

**Acting Lions** Penny Templeton,2011 Acting Lions is a comprehensive book on the craft of acting that covers the history of the craft, the craft itself, the artistry of acting, and the business of acting.

Maize Cobs and Cultures: History of Zea mays L. John Staller,2009-12-02 Our perceptions and conceptions regarding the roles and importance of maize to ancient economies is largely a product of scientific research on the plant itself, developed for the most part out of botanical research, and its recent role as one of the most important economic staples in the world. Anthropological research in the early part of the last century based largely upon the historical particularistic approach of the Boasian tradition provided the first evidence that challenged the assumptions about the economic importance of maize to sociocultural developments for scholars of prehistory. Subsequent ethnobotanic and archaeological studies showed that the role of maize among Native American cultures was much more complex than just as a food staple. In Maize Cobs and Cultures, John Staller provides a survey of the ethnohistory and the scientific, botanical and biological research of maize, complemented by reviews on the ethnobotanic, interdisciplinary and multidisciplinary methodologies.

**Introduction to Knowledge Organization** Claudio Gnoli, 2020-07-15 This book provides a complete introduction to the rapidly expanding field of Knowledge organization (KO), presenting historical precedents and theoretical foundations in a discursive, intelligible form, covering the philosophical, linguistic and technical aspects. In the contemporary context of global information exchange through linked data, Knowledge organization systems (KOS) need to be represented in standard inter-operable formats. Different formats for KOS representation including MARC, Dublin Core, SKOS and OWL are introduced as well as the application of Knowledge organization to a variety of activities and contexts: education, encyclopedic knowledge, the Internet, libraries, archives, museums, galleries and other institutions collecting and providing access to recorded knowledge. Key coverage includes: • ontology and epistemology in KO • KO structures: lists, hierarchies, facets... • KO types: tagging, taxonomies, thesauri, classifications... • conceptual analysis of documents • applications in the digital age. Covering theoretical and practical aspects of KO and using real-life examples to illustrate its application, this book will be a valuable resource for students, researchers and practitioners of Knowledge organization, information organization, cataloguing and classification.

**Atlas of Health and Climate** World Health Organization, 2012 The Atlas of health and climate is a product of this unique collaboration between the meteorological and public health communities. It provides sound scientific information on the connections between weather and climate and major health challenges. These range from diseases of poverty to emergencies arising from extreme weather events and disease outbreaks. They also include environmental degradation, the increasing prevalence of noncommunicable diseases and the universal trend of demographic ageing. The Atlas conveys three key messages. First, climate affects the geographical and temporal distribution of large burdens of disease and poses important threats to health security, on time scales from hours to centuries. Second, the relationship between health and climate is influenced by many other types of vulnerability, including the physiology and behaviour of individuals, the environmental and socio-economic conditions of populations, and the coverage and effectiveness of health programmes. Third, climate information is now being used to protect health through risk reduction, preparedness and response over various spatial and temporal scales and in both affluent and developing countries. It is our hope that the Atlas of Health and Climate will serve as a visual - call to action - by illustrating not only the scale of challenges already confronting us - and certain to grow more acute - but also by demonstrating how we can work together to apply science and evidence to lessen the adverse impacts of weather and climate and to build more climate-resilient health systems and communities.

**Rubén Fontana** Rubén Fontana, Jorge Frascara, 1993 This series explores architecture; furniture; and interior, graphic, and industrial design with the intention of reflecting the wealth and diversity found in the extensive panorama of contemporary design. The designers themselves stylize the presentation and decide what material will be included -- therefore presenting not only a reference text, but also exhibiting another aspect of the designer's creative vision.
