**Biological Processes Associated with Impact Events** Charles Cockell, Christian Koeberl, Iain Gilmour, 2006-05-18 The biological effects of asteroid and comet impacts have been widely viewed as primarily destructive. The role of an impactor in the K/T boundary extinctions has had a particularly important influence on thinking concerning the role of impacts in ecological and biological changes. During the 10 and final workshop of the ESF IMPACT program during March 2003, we sought to investigate the wider aspects of the involvement of impact events in biological processes, including the beneficial role of these events from the prebiotic through to the ecosystem level. The ESF IMPACT programme (1998-2003) was an interdisciplinary effort that is aimed at understanding impact processes and their effects on the Earth environment, including environmental, geological and biological changes. The IMPACT programme has 15 member states and the activities of the programme range from workshops to short courses on topics such as impact stratigraphy, shock metamorphism, etc. The program has also awarded mobility grants and been involved in the development of teaching aids and numerous publications, including this one.

Bolívar and the War of Independence Daniel Florencio O'Leary, 2014-02-19 "Without a doubt the best work ever published in the English language on the life and deeds of Simón Bolívar. . . . Full of interesting vignettes." —Inter-American Review of Bibliography The overthrow of Spanish rule and the birth of new republican governments in northern South America at the dawn of the nineteenth century were in large part the work of one man—Simón Bolívar. Bolívar was not only the soldier who built a patriot army from a small band of exiles and led them victoriously across Venezuela and down the spine of the Andes as far as Potosí; he was also the statesman who framed the new republics and called the Congress of Panama in pursuit of his dream of uniting all the South American republics in a single confederation. He was, truly, the Liberator. This narrative by his friend and chief aide, Daniel Florencio O'Leary, has long been recognized by Spanish American scholars as one of the most important historical sources for a major part of Bolívar's life. O'Leary took an active part in the wars for independence, first as a young officer recruited in the British Isles, and later was entrusted with diplomatic missions. His firsthand knowledge of the events of the period, his access to relevant documents, and his close association with major figures in the struggle made O'Leary a particularly valuable chronicler and biographer. Bolívar himself, shortly before his death, requested that O'Leary write the story of his life. O'Leary's meticulous attention to military and diplomatic maneuvers and his keen, sometimes acrid, comments on both men and events give not only a vivid portrait of Bolívar—the man and his achievements—but also a remarkable insight into the autocratic-minded O'Leary. Though O'Leary's devotion to, and admiration for, his Chief make for an occasionally partisan view, his stark account of the hardships and disappointments that Bolívar and his armies overcame against almost impossible odds does much to balance the narrative. In his abridged translation, Robert McNerney has omitted the Apéndice, documents that O'Leary, had he lived, undoubtedly would have used as the source for completing his account of Bolívar's life. Numerous letters and documents scattered through the original text also have been omitted, leaving a highly readable biography.

**Representing Reality** Bill Nichols, 1992-02-22 . . . a valuable and important book . . . —The Year's Work in Critical and Cultural Theory Representing Reality is the first book to offer a conceptual overview of documentary filmmaking practice. It addresses numerous social issues and how they are presented to the viewer by means of style, rhetoric, and narrative technique. The volume poses questions about the relationship of the documentary tradition to power, the body, authority, knowledge, and our experience of history. This study advances the pioneering work of Nichols's earlier book, *Ideology and*

the Image. [Nichols] has written a road-block of a book which reconfigures the debate on the documentary at a new level of sophistication and complexity which can only be ignored at the risk of ignoring the whole area of documentary film. —Sight and Sound . . . the most important book on documentary film yet published. —Canadian Journal of Film Studies
