## Janwillem van de Wetering

*Elements of Surgery* John Syng Dorsey, 1818

**The Orphic Hymns**, 2013-07-31 The best-selling English translation of the mysterious and cosmic Greek poetry known as the Orphic Hymns. At the very beginnings of the Archaic Age, the great singer Orpheus taught a new religion that centered around the immortality of the human soul and its journey after death. He felt that achieving purity by avoiding meat and refraining from committing harm further promoted the pursuit of a peaceful life. Elements of the worship of Dionysus, such as shape-shifting and ritualistic ecstasy, were fused with Orphic beliefs to produce a powerful and illuminating new religion that found expression in the mystery cults. Practitioners of this new religion composed a great body of poetry, much of which is translated in *The Orphic Hymns*. The hymns presented in this book were anonymously composed somewhere in Asia Minor, most likely in the middle of the third century AD. At this turbulent time, the Hellenic past was fighting for its survival, while the new Christian faith was spreading everywhere. The Orphic Hymns thus reflect a pious spirituality in the form of traditional literary conventions. The hymns themselves are devoted to specific divinities as well as to cosmic elements. Prefaced with offerings, strings of epithets invoke the various attributes of the divinity and prayers ask for peace and health to the initiate. Apostolos N. Athanassakis and Benjamin M. Wolkow have produced an accurate and elegant translation accompanied by rich commentary.

**Digital Scholarly Editing** Elena Pierazzo, 2016-03-16 This book provides an up-to-date, coherent and comprehensive treatment of digital scholarly editing, organized according to the typical timeline and workflow of the preparation of an edition: from the choice of the object to edit, the editorial work, post-production and publication, the use of the published edition, to long-term issues and the ultimate significance of the published work. The author also examines from a theoretical and methodological point of view the issues and problems that emerge during these stages with the application of computational techniques and methods. Building on previous publications on the topic, the book discusses the most significant developments in digital textual scholarship, claiming that the alterations in traditional editorial practices necessitated by the use of computers impose radical changes in the way we think and manage texts, documents, editions and the public. It is of interest not only to scholarly editors, but to all involved in publishing and readership in a digital environment in the humanities.

*Algae of Australia* Gustaaf M. Hallegraeff, 2010 Phytoplankton account for more than 90% of the biomass of living organisms in the world's seas and produce 50% of the atmospheric oxygen we breathe. They form the base of all marine food webs and play a critical role in shaping global climate. There is an increasing appreciation of their value as key biological indicators of ocean health and the impact of climate change on marine life, fisheries and humans. *Algae of Australia: Phytoplankton of Temperate Coastal Waters*, the product of three decades of research by Professor Gustaaf Hallegraeff and 11 collaborators, provides descriptions and illustrations of 541 species known from the estuarine, coastal and offshore waters of southern Australia. It includes more than 1,100 photographs and drawings, and represents the first guide for the identification of these fundamentally important microscopic algae in the temperate Australasian region. The book, incorporating comprehensive bibliographies and a glossary of technical terms, will become an indispensable resource for oceanographers, fisheries biologists, aquaculture managers, as well as enquiring non-specialists. Key Features \* These organisms form the base of all marine food webs and they are a key indicator of changing ocean temperatures \* Full descriptions provided for 541 species \* Habitat and distributional information included along with more than 1,100 photographs to aid identification

To Love, Intransitive Verb Mário de Andrade, 2018-09-30 A bilingual translation of Mário de Andrade's novel *Amar, verbo intransitivo*, a classic Brazilian Modernist novel of prohibited love, changing morals, and the nouveau-riche of São Paulo in the early 20th century.

Text, Speech and Dialogue Petr Sojka, Aleš Horák, Ivan Kopeček, Karel Pala, 2014-09-01 This book constitutes the refereed proceedings of the 17th International Conference on Text, Speech and Dialogue, TSD 2013, held in Brno, Czech Republic, in September 2014. The 70 papers presented together with 3 invited papers were carefully reviewed and selected from 143 submissions. They focus on topics such as corpora and language resources; speech recognition; tagging, classification and parsing of text and speech; speech and spoken language generation; semantic processing of text and speech; integrating applications of text and speech processing; automatic dialogue systems; as well as multimodal techniques and modelling.

Writing Systems Geoffrey Sampson, 1985 To say that writing has as much claim as speech to be treated as language may strike the reader as a statement of the obvious. But the fact is that, although the tide is beginning to turn now, for most of the twentieth century linguistics has almost wholly ignored writing. It is not necessary to accept all the theories of the French critic Jacques Derrida in order to agree with him when he describes writing as the wandering outcast of linguistics. This book is offered in the belief that written language is a form of language. As such, it deserves to be treated with the methods of modern, scientific linguistic study, which have been increasing our understanding of the spoken form of language for many decades.

*Some American Medical Botanists Commemorated in Our Botanical Nomenclature* Howard Atwood Kelly, 1914 This book contains brief biographies, portraits and pictures of the specimens that the botanists were noted for. The botanists discussed range from Joseph Trimble Rothrock, an American environmentalist, recognized as the Father of Forestry in Pennsylvania to Charles Wilkins Short, a Kentuckian who discovered several species of plants and has six species of plants named after him, who also practiced medicine and taught materia medica.
