Sara Schoonmaker

Exporters' Review, 1912

Free Software, the Internet, and Global Communities of Resistance Sara Schoonmaker, 2018-01-19 This book explores software's pivotal role as the code that powers computers, mobile devices, the Internet, and social media. Creating conditions for the ongoing development and use of software, including the Internet as a communications infrastructure, is one of the most compelling issues of our time. Free software is based upon open source code, developed in peer communities as well as corporate settings, challenging the dominance of proprietary software firms and promoting the digital commons. Drawing upon key cases and interviews with free software proponents based in Europe, Brazil and the U.S., the book explores pathways toward creating the digital commons and examines contemporary political struggles over free software, privacy and civil liberties on the Internet that are vital for the commons' continued development.

Back Home in Washington Paulo Sergio Santos Negrete | Teacher John Chapman, 2011-01-07 The present English textbook is in accordance with the theoretical development of Suggestopedic teaching and its newest development, Desuggestopedia. The book reflects the theory of Suggestopedia in its integrity: The global and artistic approaches. Suggestopedia is the only method approved and recommended by UNESCO as being a superior method to any other. It accelerates the learning process several times without stress or fatigue. The Suggestopedic teaching through this book can also produce a variety of positive by-products, such as psychoprophylactic and psychotherapeutic effects. During the Suggestopedic teaching, there is simultaneous activation of the left and right hemispheres of the brain, although in different degrees. Students feel and report pleasant learning while they develop creative memory through logical-emotional and conscious-paraconscious activities in class. The author of the textbook, Prof. Paulo Negrete., has been trained and certified by Dr. Lozanov, the creator of Suggestopedia and the science of Suggestology, and has worked in the field of English teaching through Suggestopedia for many years. He was the pioneer to introduce Suggestopedia in Brazil, in 2000, is the author of books to train teachers in TEFL/TESOL in Suggestopedia, and is the Academic Director of Aprendizagem Acelerada de Idiomas in Brazil.

A Frequency Dictionary of Portuguese Mark Davies, Ana Maria Raposo Preto-Bay, 2007-11-29 An invaluable tool for learners of Portuguese, this Frequency Dictionary provides a list of the 5000 most commonly used words in the language.

Based on a twenty-million-word collection of Portuguese (taken from both Portuguese and Brazilian sources), which includes both written and spoken material, this dictionary provides detailed information for each of the 5000 entries, including the English equivalent, a sample sentence, and an indication of register and dialect variation. Users can access the top 5000 words either through the main frequency listing or through an alphabetical index. Throughout the frequency listing there are also thirty thematically-organized 'boxed' lists of the top words from a variety of key topics such as sports, weather, clothing and relations. An engaging and highly useful resource, A Frequency Dictionary of Portuguese will enable students of all levels to get the most out of their study of Portuguese vocabulary. Former CD content is now available to access at www.routledge.com/9780415419970 as support material. Designed for use by corpus and computational linguists it provides the full text in a format that researchers can process and turn into suitable lists for their own research work.

Relembrando-A Velha Literatura de Cordel e a Voz dos Poetas Mark J. Curran, 2014-09-24 Relembrando-A Velha Literatura de Cordel e a Voz dos Poetas really contains three important studies on the cordel: 1) the revision and translation of Curran's PhD dissertation from 1968; 2) the augmentation of one of the chapters of the dissertation, treating Brazil's best known and pioneering poet Leandro Gomes de Barros; 3) the publication of a now historic series of interviews with forty cordel poets and publishers in the late 1970s. Curran dedicates much time and energy to this endeavor because he believes the researches were little known in their original form, and more importantly, with the passage of time and the evolution of the cordel and Brazil in general, they now remain as historic documents in Brazil's national cultural history.

Charting a New Course Fernando Henrique Cardoso, 2001 For decades F. H. Cardoso has been among the most influential of Latin American scholars, his writings on globalization, dependency, and politics having reached a world-wide audience. This book, the third by Cardoso to appear in English, is the first to incorporate essays written during his tenure as president of Brazil. The transformation of Cardoso's economic and political approach is nowhere better documented than in this broad-ranging collection of writings that span Cardoso's early theoretical work through his pragmatic agenda for Brazil in a rapidly changing world economy. The book also traces the development of one of the world's leading intellectuals, who took theory into the arena of policy when he became head of state.
