Insect Diets Allen Carson Cohen, 2015-06-15 Dr. Allen Carson Cohen's new edition of *Insect Diets: Science and Technology* continues to provide a current, integrated review of the field of insect diets. It reaffirms and expands upon the belief that the science of diet development and the technology of diet application in rearing programs require formal foundations and guidelines. Cohen argues for a data-driven approach as well as a focus on humane treatment in insect rearing programs. He also calls for academics and industries to make a new push toward statistical process control (SPC) in their approaches to rearing in general, using his own work with insects as a paradigm. This approach yields the benefits of careful scientific analysis by addressing issues of quality and efficiency in academic research and industrial practices and applications. See What's New in the Second Edition: This edition expands upon the role of food science in the use of artificial diets in rearing programs, especially texture analysis with rheological techniques. It includes an entirely new chapter focused solely on the subject of food quality in insect diets. The book also revisits microbial relationships to insect diets as a powerful influence on their feeding processes and emphasizes a new, better understanding and utilization of the relationship between insects and microbes in artificial diets. Cohen also expands his vision of the future of insect rearing, including the use of insects themselves as a potential food source for a rapidly expanding global human population. To that end, this book gives you guidelines to develop, use, and evaluate artificial diets in order to improve their cost and scientific efficiency in the rearing of insects, because as the author urges, it is important to know your insect. This understanding will serve the multifaceted goals of using insect rearing for research and teaching, pest management strategies and biocontrol agents, as food for other organisms, and for many other purposes.

Alma Brasileira, evidenciando a potência da Psicologia Analítica em campos interdisciplinares. E, assim, contribuir com a autoconstrução da identidade nacional, que após o ano de 1500 d.C., emana de históricos quadrantes cuja circunferência revela imagens da psicologia complexa: África, Europa, América e Ásia. Neste cenário circular, os membros do Grupo de Trabalho: Interdisciplinaridades da Pesquisa em Psicologia Analítica no Brasil (GT-AION) buscam investir na colaboração da inserção social dos respectivos Programas, a partir de parcerias em projetos de investigação, os quais, alguns foram apresentados e discutidos no I Encontro do GT, com a presença de professoras doutoras e professores doutores, pesquisadoras e pesquisadores, representantes das regiões brasileiras: Norte, Nordeste, Centro-Oeste, Sudeste e Sul. Convidamos o leitor do presente e-Book: Pesquisa em Psicologia Junguiana no Brasil (Norte, Nordeste, Centro-Oeste, Sudeste e Sul) a atravessar essa jornada de leitura do Norte ao Sul do Brasil, participando das reflexões sobre cada encontro e discussão, sobre os temas apresentados que estão no imaginário social do povo brasileiro, a saber: (a) Psicologia Analítica muito além da prática clínica; (b) Mitologia, símbolo e transformação da Alma; (c) A psicologia complexa e o Programa de Pós-Graduação em Ciência da Religião da PUC-Minas; (d) Possibilidades polifônicas da Psicologia Junguiana; (e) Caminho, pertencimento e encruzilhadas da Religião no Brasil; (f) Caminhos de PEABIRU: aprendizagens interculturais, e, (g) Psicologia Junguiana, mangá e a imigração japonesa na Amazônia Brasileira. Desejamos a todos uma boa leitura e reflexão para, também, participar daquele exercício intelectual proposto pelo GT-AION, a partir da dimensão do inconsciente por ela ser a-espacial e atemporal, na constante dialética individual e coletiva, à luz da consciência da história do Brasil.

The Cerrados of Brazil Paulo S.,2013-02-05 The massive grasslands of Brazil -- known as the cerrados -- which cover roughly a quarter of its land surface and are among the most threatened regions in South America, have received little media attention. This book brings together leading researchers on the area to produce the first detailed account in English of the natural history and ecology of the cerrado/savanna ecosystem. Given their extent and threatened status, the richness of their flora and fauna, and the lack of familiarity with their unique ecology at the international level, the cerrados are badly in need of this important and timely work.

Racism and Human Development Luciana Dutra-Thomé,Dóris Firmino Rabelo,Dandara Ramos,Emanuelle Freitas Góes,2021-11-19 This book addresses the lifelong effects of racism, covering its social, psychological, family, community and health impacts. The studies brought together in this contributed volume discuss experiences of discrimination, prejudice and exclusion experienced by children, young people, adults, older adults and their families; the processes of socialization, emotional regulation and construction of ethnic-racial identities; and stress-producing events associated with racism. This volume intends to contribute to a growing international effort to develop an antiracist agenda in developmental psychology by showcasing studies developed mainly in Brazil, the country with the largest black population in the world outside of Africa. Racism as an ideology that structures social relations and attributes superiority to one race over the others have

developed in different ways in different countries. As a response to the 2020 social and health crisis, some North American developmental psychologists have started promoting initiatives to openly challenge racism. This book intends to contribute to this movement by bringing together studies conducted mainly in Brazil, but also in Germany and Norway, that adopt a racially informed approach to different topics in developmental psychology. Racism and Human Development intends to be an inspiration to students, scholars and practitioners who are seeking tools and examples of studies of race and racism from a developmental perspective. The establishment of an antiracist agenda in developmental psychology will never be possible without a commitment to the study of race as an indispensable social marker of human ontogeny in any society. This book is another step towards racial equity and towards a developmental science that leaves no one behind.

Comporta Bliss Carlos Souza, 2018-05-01 Sometimes compared to the Saint-Tropez of Brigitte Bardot in the 1950s, Comporta, with its relaxed pace and artistic community, is the ideal destination for those looking to wander off course. It's the newfound favorite of personalities such as Jacques Grange, Farida Khelfa, François Dumas, the Espírito Santo family, and Madonna, who shares photographs of taking her kids to the beach and horseback riding in the dunes of nearby Carvalhal on weekends. This fishing village boasts swaths of beaches, patchworks of rice paddies, and an ecosystem filled with storks and frogs, all a serene backdrop for the striking homes found there: rustic cabanas and thatched-roof huts reflecting the carefree lifestyle that has become Comporta's hallmark. This distinctive setting challenges the minds of architects and designers, yielding unique spaces that delightfully blur the line between interior and exterior. Within these pages, the region's characteristic cobalt blue is reflected from the sky and sea to the walls, shutters, and design pieces that adorn its homes, both picturesque and bold. Discover the beauty and joy of simplicity with Comporta Bliss

Spiritism and Mental Health Emma Bragdon, 2011-09-15 Practiced in community centers and psychiatric hospitals throughout Brazil, Spiritist therapies are gaining increasing recognition internationally for their ability to complement conventional medicine. This pioneering text is the first comprehensive account of the philosophy, theory, practical applications and wider relevance of Spiritist therapies to be published in the English language. Leading practitioners and researchers in the field describe the history, principles and diagnostic processes of the Spiritist approach to mental health, and provide an extensive summary of the various methodologies used, including spiritual mediumship, energy work, prayer, homeopathy, past life regression and the practice of integrating spirituality into counselling and psychotherapy. Considering the ways in which Spiritism aligns with contemporary science, they show that the Spiritist model has the potential to bring about a positive transformation in the ways in which mental health care is conceptualized and delivered around the globe. The final part of the book explores how Spiritist centers and psychiatric hospitals are established and financed, with specific examples from Brazil and the USA. Providing important new insights into the rich tradition of Brazilian Spiritism, this authoritative text will be of interest to mental health professionals, counselors, therapists and alternative and complementary

health practitioners.

The fixed income market in Brazil - José Monteiro Varanda Neto, José Carlos De Souza Santos, Eduardo Morato Mello, 2020-11-02 Since the implementation of the Real Plan, the national fixed income market has undergone successive changes, influenced by internal and external economic crises. Few are the works that address the universe of fixed income and linear fixed income derivatives in Brazil, dealing with topics such as pricing, risk calculation, performance and hedging. In order to fill this gap, the work *The Fixed Income in Brazil - Concepts, pricing and risk* consolidates, in an organized way and at an increasing level of complexity, several themes related to this topic, mixing theory and practice. The reader will learn to price the main fixed-income instruments used in Brazil, such as Brazilian Treasury bonds, certificate of deposits, debentures (local corporate bonds) and interest rate derivatives. In addition to pricing techniques, this book deals, in depth, with themes such as: • Yield curve • Bootstrapping • Credit spread • Return calculation • Brazilian local debt securities • Brazilian global debt securities • Brazilian local linear derivatives as futures and swaps • Libor versus Fixed rate swaps • Hedge and immunization • Risk measurement This book is mostly aimed at professionals working in both the financial market and academia, who want to deepen their knowledge on fixed income markets in Brazil.

Critical Medical Anthropology Jennie Gamlin, Sahra Gibbon, Paola M. Sesia, Lina Berrio, 2020-03-12 *Critical Medical Anthropology* presents inspiring work from scholars doing and engaging with ethnographic research in or from Latin America, addressing themes that are central to contemporary Critical Medical Anthropology (CMA). This includes issues of inequality, embodiment of history, indigeneity, non-communicable diseases, gendered violence, migration, substance abuse, reproductive politics and judicialisation, as these relate to health. The collection of ethnographically informed research, including original theoretical contributions, reconsiders the broader relevance of CMA perspectives for addressing current global healthcare challenges from and of Latin America. It includes work spanning four countries in Latin America (Mexico, Brazil, Guatemala and Peru) as well as the trans-migratory contexts they connect and are defined by. By drawing on diverse social practices, it addresses challenges of central relevance to medical anthropology and global health, including

reproduction and maternal health, sex work, rare and chronic diseases, the pharmaceutical industry and questions of agency, political economy, identity, ethnicity, and human rights.

Microgrids Design and Implementation Antonio Carlos Zambroni de Souza,Miguel Castilla,2018-11-29 This book

addresses the emerging trend of smart grids in power systems. It discusses the advent of smart grids and selected technical implications; further, by combining the perspectives of researchers from Europe and South America, the book captures the status quo of and approaches to smart grids in a wide range of countries. It describes the basic concepts, enabling readers to understand the theoretical aspects behind smart grid formation, while also examining current challenges and philosophical discussions. Like the industrial revolution and the birth of the Internet, smart grids are certain to change the way people use electricity. In this regard, a new term – the “prosumer” – is used to describe consumers who may sometimes also be energy producers. This is particularly appealing if we bear in mind that most of the distributed power generation in smart grids does not involve carbon emissions. At first glance, the option of generating their own power could move consumers to leave their current energy provider. Yet the authors argue that doing so is not a wise choice: utilities will play a central role in this new scenario and should not be ignored.

City Unsilenced Jeffrey Hou, Sabine Knierbein, 2017-06-26 What do the recent urban resistance tactics around the world have in common? What are the roles of public space in these movements? What are the implications of urban resistance for the remaking of public space in the age of shrinking democracy? To what extent do these resistances move from anti- to alter-politics? *City Unsilenced* brings together a cross-disciplinary group of scholars and scholar-activists to examine the spaces, conditions, and processes in which neoliberal practices have profoundly impacted the everyday social, economic, and political life of citizens and communities around the globe. They explore the commonalities and specificities of urban resistance movements that respond to those impacts. They focus on how such movements make use of and transform the meanings and capacity of public space. They investigate their ramifications in the continued practices of renewing democracies. A broad collection of cases is presented and analyzed, including Movimento Passe Livre (Brazil), Google Bus Blockades San Francisco (USA), the Platform for Mortgage Affected People (PAH) (Spain), the Piqueteros Movement (Argentina), Umbrella Movement (Hong Kong), post-Occupy Gezi Park (Turkey), Sunflower Movement (Taiwan), Occupy Oakland (USA), Syntagma Square (Greece), Researchers for Fair Policing (New York), Urban Movement Congress (Poland), urban activism (Berlin), 1DMX (Mexico), Miyashita Park Tokyo (Japan), 15M Movement (Spain), and Train of Hope and protests against Academic Ball in Vienna (Austria). By better understanding the processes and implications of the recent urban resistances, *City Unsilenced* contributes to the ongoing debates concerning the role and significance of public space in the practice of lived democracy.
