Educational Experience as Lived: Knowledge, History, Alterity William F. Pinar, 2015-02-11 In this volume, Pinar enacts his theory of curriculum, detailing the relations among knowledge, history, and alterity. The introduction is Pinar's intellectual life history, naming the contributions he has made to understanding educational experience. Study is the center of educational experience, as he demonstrates in the opening chapter. The alterity of educational experience is evident in his conceptions of disciplinarity and internationalization, interrelated projects of historicization, dialogical encounter, and recontextualization. By reactivating the past, not by instrumentalizing the present, we can find the future, explicated in his studies of the Eight-Year Study, the Tyler Rationale, and the gendering and racialization of U.S. school reform. The interrelation of race and gender is emphasized in the chapters on Ida B. Wells and Jane Addams. The technologization of education is critiqued through analysis of the achievements of George Grant and Pier Paolo Pasolini. The educational project of subjective and social reconstruction is explored through study of Musil's essayism, a genre that corrects the problems accompanying ethnography and created by identity politics.

Practical Work in Science Education John Leach, Albert Chr. Paulsen, Albert Paulsen, 1999-12-31 This book contains 18 reviewed papers originally presented at the conference Practical Work in Science Education - the Face of Science in Schools, held at the Royal Danish School of Educational Studies in Copenhagen, in May 1998. Substantial literature about practical work has been published during the last decade. This book contains contributions by researchers from England, France, Germany, Norway, Israel, Italy, Sweden and South Africa and adds important aspects to a varied and balanced view of practical work. Some of the papers are conceptual, addressing aims and rationales for practical work from a theoretical and critical perspective. Most papers, however, encounter recent empirical research. Important aspects about the outcome of

students' practice of science both inside and outside the conventional laboratory are addressed and make a substantial contribution to our understanding of the effectiveness of practical work for conceptual learning and the attainment of skills and processes normally associated with science.

The Inter-American Court of Human Rights Laurence Burgorgue-Larsen, Amaya Ubeda de Torres, 2011-04-07 This book provides a reference guide to the case law of the Inter-American Court of Human Rights. Structured in two parts, it covers the case law on jurisdiction and procedure before the Court and the case law on the scope of particular rights, drawing comparisons with the case law of the European Court of Human Rights.

2020 Global food policy report: Building inclusive food systems International Food Policy Research Institute (IFPRI), 2020-04-06 Food systems are at a critical juncture—they are evolving quickly to meet growing and changing demand but are not serving everyone's needs. Building more inclusive food systems can bring a wide range of economic and development benefits to all people, especially the poor and disadvantaged. IFPRI's 2020 Global Food Policy Report examines the policies and investments and the growing range of tools and technologies that can promote inclusion. Chapters examine the imperative of inclusion, challenges faced by smallholders, youth, women, and conflict-affected people, and the opportunities offered by expanding agrifood value chains and national food system transformations. Critical questions addressed include: How can inclusive food systems help break the intergenerational cycle of poverty and malnutrition? What can be done to strengthen the midstream of food value chains to improve rural access to jobs, markets, and services? Will Africa's food systems generate sufficient jobs for the growing youth population? How can women be empowered within food system processes, from household decisions to policymaking? Can refugees and other conflict-affected people be integrated into food systems to help them rebuild their lives? How can national food system transformations contribute to greater dietary diversity, food safety, and food quality for all? Regional sections look at how inclusion can be improved around the world in 2020 and beyond. The report also presents interesting trends revealed by IFPRI's food policy indicators and datasets.

Fish Bioenergetics M. Jobling, 1994-03-31 Looks at the relationship of fish to the food they eat, their growth and responses to the environment. The physiology and nutrition of fish are examined from an energetic standpoint, with the environmental influences upon feeding and growth being emphasized.

Learning Mathematics Anthony Orton, 2004-12-30 • Why do some students achieve more than others? • Do we have to wait until pupils are ready? • Can children discover math for themselves? • Does language interfere with the learning of math? This classic text, written from the viewpoint of the math teacher, provides answers to these and many more questions. Each chapter explores a particular issue that illustrates the interaction between theory and practice. New chapters have been included on cognition, pattern, and ICT.

The Cartoon Guide to Algebra Larry Gonick,2015-01-15 In this latest edition to the successful Cartoon Guide series, master cartoonist and former Harvard instructor Larry Gonick offers a complete and up-to-date illustrated course to help students understand and learn this core mathematical course taught in American schools. Using engaging graphics and lively humor, Gonick covers all of the algebra essentials, including linear equations, polynomials, quadratic equations, and graphing techniques. He also offers a concise overview of algebra's history and its many practical applications in modern life. Combining Gonick's unique ability to make difficult topics fun, interesting, and easy-to-understand—while still relaying the essential information in a clear, organized and accurate format—The Cartoon Guide to Algebra is an essential supplement for students of all levels, in high school, college, and beyond.

The Coconut Palm (Cocos nucifera L.) - Research and Development Perspectives V. Krishnakumar,P. K. Thampan,M. Achuthan Nair,2019-02-15 Since the publication of The coconut palm - A monograph in 1960, considerable information has been accrued on the crop through work at research institutes, international organisations and development agencies. Although coconut cultivation is spread over 93 countries, providing employment and creating livelihood opportunities to 64 million families around the globe, smallholder coconut farmers are now facing numerous challenges. The wide gap between the potential and actual yield is a major concern, and as such it is necessary to disseminate knowledge in order to implement research findings. Coconut research in India, one of the leading coconut producing countries, is celebrating its centenary, making this an opportune time to review the research and development advances and the relevant technologies. This detailed, comprehensive book covers all aspects of coconut, from the origins to cultivation, breeding, physiology and value addition, as well as subjects of topical interest like nutrition and health, biotechnology, and climate change and carbon sequestration. Written by leading experts in the fields it emphasises that the livelihood of the small coconut landholders is the ultimate aim of scientists and developmental agencies, and outlines various important strategies to make coconut farming more remunerative globally. It discusses work in all the major coconut growing countries and outlines suggestions for international cooperation. Research work on the crop is comparatively difficult because of its perennial nature, longevity, height, long juvenile phase, large sized nuts, cross pollination and seed propagation. As these special features necessitate greater investment of resources, time and land, it is all the more imperative that research is not duplicated and the information and experience becoming available around the world is shared so that it can be fully utilised. In this context periodic publications, compiling all the available information on coconut assume greater significance. This book is therefore of great value to researchers, students, extension workers, developmental agencies and progressive farmers.

Pedagogy of Hope Paulo Freire,2014-04-24 With the publication of Pedagogy of the Oppressed, Paulo Freire established

himself as one of the most important and radical educational thinkers of his time. In *Pedagogy of Hope*, Freire revisits the themes of his masterpiece, the real world contexts that inspired them and their impact in that very world. Freire's abiding concern for social justice and education in the developing world remains as timely and as inspiring as ever, and is shaped by both his rigorous intellect and his boundless compassion. *Pedagogy of Hope* is a testimonial to the inner vitality of generations denied prosperity and to the often-silent, generous strength of millions throughout the world who refuse to let hope be extinguished.

Teachers as Intellectuals Henry A. Giroux, 2024-12-12 First published in 1988, *Teachers as Intellectuals* encourages us to see schools as democratic spaces in which teachers and students work together to transform society. Giroux incorporates the most valuable insights of critical pedagogy into a more comprehensive and practical theory of schooling, committed to educating students in the language of critique and possibility. At the heart of his vision for schooling is the ability of the teacher to act as a transformative intellectual and to use critical pedagogy as a form of cultural politics. The book includes an introduction by Paulo Freire, a foreword by Peter McLaren and new introduction from the author.

Danto and His Critics Mark Rollins, 2012-05-15 Updated and revised, the Second Edition of *Danto and His Critics* presents a series of essays by leading Danto scholars who offer their critical assessment of the influential works and ideas of Arthur C. Danto, the Johnsonian Professor Emeritus in the Department of Philosophy at Columbia University and long-time art critic for *The Nation*. Reflects Danto's revisions in his theory of art, reworking his views in ways that have not been systematically addressed elsewhere Features essays that critically assess the changes in Danto's thoughts and locate Danto's revised theory in the larger context of his work and of aesthetics generally Speaks in original ways to the relation of Danto's philosophy of art to his theory of mind Connects and integrates Danto's ideas on the nature of knowledge, action, aesthetics, history, and mind, as well as his provocative thoughts on the philosophy of art for the reader

Theories of Art Today Noël Carroll, 2000 What is art? The contributors to *Theories of Art Today* address the assertion that the term "art" no longer holds meaning. They explore a variety of issues including: aesthetic and institutional theories of art, feminist perspectives on the philosophy of art, the question of whether art is a cluster concept, and the relevance of tribal art to philosophical aesthetics. Contributors to this book include such distinguished philosophers and historians as Arthur Danto, Joseph Margolis, and George Dickie.

The Dance Encyclopedia Anatole Chujoy, 1949 A complete reference library in one volume, the *Dance Encyclopedia* is brimful of all the essential facts of the dance which have been scattered until now through hundreds of books, many of them inaccessible to most readers because of language and rarity.

Cutaneous Drug Eruptions John C. Hall, Brian J. Hall, 2015-08-21 The burden of cutaneous drug reactions is significant, in both outpatient and inpatient settings, and can result in morbidity and even mortality. This book is unique in its approach to

this problem. This text is divided into basic principles, common drug reactions, skin conditions mimicked by drug reactions, drug reactions to the skin appendages, life-threatening drug reactions, less common drug reactions, and special groupings of drug reactions. For the clinician, the skin can only morphologically react in to many limited ways. This is also true for the pathologist. Combining these two forever linked specialties is a synergistic paradigm that greatly enhances diagnosis, and ultimately therapy, for these pernicious conditions. Drug reactions in the skin remain a common complication of therapy. True incidences of drug reactions are not available. For general discussion, the rule of 3% can be applied with reasonable assuredness. Approximately 3% of all hospitalized patients develop an adverse cutaneous drug reaction. Approximately 3% of these reactions are considered severe. Outpatient data is even more obscure, but at least 3% of dermatology clinic outpatient visits are due to a drug reaction. Cutaneous drug reactions compromise approximately 3% of all drug reactions. Even more challenging is the fact that the most vulnerable populations to drug reactions are increasing and include the elderly patients on prolonged drug therapy, and patients that use multiple drugs at the same time.

History and Memory Jacques Le Goff,1992 In this brilliant meditation on conceptions of history, Le Goff traces the evolution of the historian's craft. Examining real and imagined oppositions between past and present, ancient and modern, oral and written history, History and Memory reveals the strands of continuity that have characterized historiography from ancient Mesopotamia to modern Europe.

A Child's Right to Respect Janusz Korczak,2017

Matter And Memory Henri Bergson,2011-09-15 This book affirms the reality of spirit and the reality of matter, and tries to determine the relation of the one to the other by the study of a definite example, that of memory. It is, then, frankly dualistic. But, on the other hand, it deals with body and mind in such a way as, we hope, to lessen greatly, if not to overcome, the theoretical difficulties which have always beset dualism, and which cause it, though suggested by the immediate verdict of consciousness and adopted by common sense, to be held in small honor among philosophers.

The Western Intellectual Tradition Jacob Bronowski,Bruce Mazlish,1962-08-01 Traces the development of thought through historical movements and periods from 1500 to 1830.
