Moore Than Meets the Eye C. F. Winn, 2020-07-20 What are you hiding? MOORE THAN MEETS THE EYE is the second installment in the COFFEE BREAK SERIES by CF Winn. It tells the story of one day in the life of two strangers who are thrown together at a photo shoot. On a sunny beach in California, Joanna Moore, model of the moment, poses for the camera as if her life is every bit as beautiful as she is, but she struggles to be seen as a regular human being beneath her gorgeous exterior. For Joanna, making good decisions is a challenge, and as time goes on, she discovers that consequences come in

many shapes and sizes. Benny, her photographer, has reached a bump in his career and in his relationship. He has everyone believing that he is an open book. That he wears his fat, balding, gay man persona as comfortably as granny panties on laundry day. But hidden under a high-strung personality and a huge appetite is someone who loves and wants to be loved. As the camera clicks away, they have no idea that they've already crossed bloody paths. Via different perspectives and telling flashbacks, little by little, the entire story is revealed. The reader learns that our actions and reactions connect us and that unless we know someone's story, until we have walked a mile in their shoes, in every situation, there is always MOORE THAN MEETS THE EYE.

Semantics in Mobile Sensing Zhixian Yan, Dipanjan Chakraborty, 2022-06-01 The dramatic progress of smartphone technologies has ushered in a new era of mobile sensing, where traditional wearable on-body sensors are being rapidly superseded by various embedded sensors in our smartphones. For example, a typical smartphone today, has at the very least a GPS, WiFi, Bluetooth, triaxial accelerometer, and gyroscope. Alongside, new accessories are emerging such as proximity, magnetometer, barometer, temperature, and pressure sensors. Even the default microphone can act as an acoustic sensor to track noise exposure for example. These sensors act as a lens to understand the user's context along different dimensions. Data can be passively collected from these sensors without interrupting the user. As a result, this new era of mobile sensing has fueled significant interest in understanding what can be extracted from such sensor data both instantaneously as well as considering volumes of time series from these sensors. For example, GPS logs can be used to determine automatically the significant places associated to a user's life (e.g., home, office, shopping areas). The logs may also reveal travel patterns, and how a user moves from one place to another (e.g., driving or using public transport). These may be used to proactively inform the user about delays, relevant promotions from shops, in his regular route. Similarly, accelerometer logs can be used to measure a user's average walking speed, compute step counts, gait identification, and estimate calories burnt per day. The key objective is to provide better services to end users. The objective of this book is to inform the reader of the methodologies and techniques for extracting meaningful information (called semantics) from sensors on our smartphones. These techniques form the cornerstone of several application areas utilizing smartphone sensor data. We discuss technical challenges and algorithmic solutions for modeling and mining knowledge from smartphone-resident sensor data streams. This book devotes two chapters to dive deep into a set of highly available, commoditized sensors---the positioning sensor (GPS) and motion sensor (accelerometer). Furthermore, this book has a chapter devoted to energy-efficient computation of semantics, as battery life is a major concern on user experience.

Communicative Action and Rational Choice Joseph Heath, 2003-01-24 In this book Joseph Heath brings Jürgen Habermas's theory of communicative action into dialogue with the most sophisticated articulation of the instrumental conception of practical rationality-modern rational choice theory. Heath begins with an overview of Habermas's action theory and his critique of decision and game theory. He then offers an alternative to Habermas's use of speech act theory to explain social order and outlines a multidimensional theory of rational action that includes norm-governed action as a specific type. In the second part of the book Heath discusses the more philosophical dimension of Habermas's conception of practical rationality. He criticizes Habermas's attempt to introduce a universalization principle governing moral discourse, as well as his criteria for distinguishing between moral and ethical problems. Heath offers an alternative account of the level of convergence exhibited by moral argumentation, drawing on game-theoretic models to specify the burden of proof that the

theory of communicative action and discourse must assume.
